Free telephone calls in the WorldWideWeb tiptel 118 USB phone

In connection with a computer disposing of a broadband Internet connection (e. g. DSL) the tiptel 118 USB phone allows free world-wide telephone calls within the Skype* network. As soon as the telephone is connected to the USB port and software – available via free of charge download – is installed, you can start.

The integrated keypad render operation simple and comfortable. Thus, the tiptel 118 USB phone for example offers the possibility of scrolling in the Skype* contacts shown on the monitor and by pressing the key the connection to the required conversation partner is established.

The tiptel 118 USB phone is appropriate for a home-based PC as well as for the business notebook. Whether phone calls to friends, family members or to the company headquarters – there are many possibilities of staying in contact and for saving call charges using the tiptel 118 USB phone.

- USB telephone for Skype*
- Easy selection and dialling of Skype* contact persons by pressing a key
- Integrated keypad for Skype*-Out (Skype* tariff for other networks, e.g. landline network)
